

Late War Finnish Jägers in Flames of War

The following force represents elements of the 3rd Jäger Battalion of the Lagus Armored Divisions during this counter-attack on the morning of June 26th. Since the Finnish LW list has yet to be released from play testing, I am using the Fallschirmjäger list from Fortress Europe. All equipment used in this force was present in the Jäger Brigade of the Lagus Armored Division during the fighting at Tali-Ihantala.
